

# Programmable Controllers

This micro-controller-based design has built-in flexibility with four external ground inputs, PWM output, 12V switched output, and 12V feed-through. Three hidden indicators and three *dpx*<sup>™</sup> switches round out the features of this product. Displays and feedback circuits are also available.

## VisionMark, Inc.

Exclusive North American distributor  
for the fire apparatus industry  
2309 Industrial Drive, Sidney, OH 45365  
Phone: 937-492-3100  
Fax: 937-492-3108

## Specification

Data Panel's engineering staff works with customers to fully understand each application. Only then do we document a complete set of design, development, and performance specifications

## Design

Data Panel performs all electrical design and board layout in house – controlling every aspect of the development process.

## Prototype

When required and/or requested, quick turn production intent prototypes can be developed to prove the design application.

## Production

Our manufacturing group has a broad range of production experience and personnel. Just-In-Time deliveries support numerous rescue vehicle manufactures.

## Field Support

Field Service personnel are always available to provide answers, service, and support for our customers and their customers!
