

Interlock Modules

Create one clean, organized package with a Data Panel Interlock Module for jack or aerial control. It's simple to implement with your schematic, and the modular connections save you time! You can even incorporate flasher and timer circuits. Diagnostic LEDs show circuit performance.

VisionMark, Inc.

*Exclusive North American distributor
for the fire apparatus industry*
2309 Industrial Drive, Sidney, OH 45365

Specification

Data Panel's engineering staff works with customers to fully understand each application. Only then do we document a complete set of design, development, and performance specifications

Design

Data Panel performs all electrical design and board layout in house – controlling every aspect of the development process.

Prototype

When required and/or requested, quick turn production intent prototypes can be developed to prove the design application.

Production

Our manufacturing group has a broad range of production experience and personnel. Just-In-Time deliveries support numerous rescue vehicle manufactures.

Field Support

Field Service personnel are always available to provide answers, service, and support for our customers and their customers!
