

# Rocker Switch Panels

With a rocker switch panel from Data Panel, you don't just get good looks... you also get great performance:

- Each switch panel is constructed to withstand the most rigorous applications whether environmental or operational
- Standard design is a .090 aluminum face covered with a high quality polycarbonate graphic layer
- Available in 2, 4, 7, 9, 11, 12 and 14 positions as standard
- Custom panel geometries also available

## Advantages of a Data Panel Rocker Switch Panel

- Legends are applied from the front for ease of assembly and change.
- Legends seat .005" below flush for a smooth front surface
- Electroluminescent backlighting and LED switch indicators provide optimum visibility in all lighting conditions
- Incorporating meters, warning lights hidden indicators and alarms on the subsurface provides a smooth, original equipment appearance
- Stud-mount for clean, front surface, or optional screw mount for ease of assembly
- Multiple switch styles, circuits, colors and manufacturers are available
- Panels available as panels only or with any combination of switches and legends installed
- In-house screen-printed graphics and legends offer unsurpassed user flexibility and short lead time

## VisionMark, Inc.

Exclusive North American distributor  
for the fire apparatus industry  
2309 Industrial Drive, Sidney, OH 45365  
Phone: 937-492-3100  
Fax: 937-492-3108

## Specification

Data Panel's engineering staff works with customers to fully understand each application. Only then do we document a complete set of design, development, and performance specifications

## Design

Data Panel performs all electrical design and board layout in house – controlling every aspect of the development process.

## Prototype

When required and/or requested, quick turn production intent prototypes can be developed to prove the design application.

## Production

Our manufacturing group has a broad range of production experience and personnel. Just-In-Time deliveries support numerous rescue vehicle manufactures.

## Field Support

Field Service personnel are always available to provide answers, service, and support for our customers and their customers!
